November 2011

Between 1984 and 1993 our family resided in the States. We were on our way from Britain to New Zealand, and were delayed by the wonderful lifestyle America had to offer, and for the opportunities we were able to provide for our children.

It was clear, very early on, that organised sports activities were not popular with either of our children. How wonderful then, to discover Theatrics.

Through the guidance of Mark, and his colleagues (all brilliant role models) my children actively took on the physical challenges of Clown Arts. They learnt to be team players, they became strong and fit, and after the learning and endless practising, they were completely delighted with performing.

Our children tell us how great it was to meet so many other children that weren't at their school, or necessarily their age, many of whom became firm friends that they are still in contact with. They also say there were no other adults in their lives at that time that had such a strong and positive influence on their development.

I am also still in contact (from the other side of the world) with Mark and Theatrics, and I follow their news and events.

I strongly recommend this group to any family with a child who needs a creative and positive physical outlet.

Yours truly,

Tina Wylie
Director of International Students
Oxford Area School
